Subject: Techalloy MPR Dec. 2016

John--I received the December 2016 Monthly Progress Report for the Techalloy/Central Wire Facility in Union, IL prepared by Autumwood ESH Consultants and dated Jan. 15, 2017. I have only a couple of comments.

Progress Made This Report Period: the average daily treatment volume has been declining over the past couple of months. The report should explain why, and what is being done about it.

Not a big deal, but can Central Wire explain why it took 2 days for the samples to make it to the lab?

Sample results for well 1 and 2 should be discussed.

Upcoming Events: Some routine water-quality sampling from the monitoring and residential wells supposed to have been performed in December. The text notes sampling should have been done, but not whether or not it was. Was this sampling done? If not, why not? If it was done, a brief discussion of this effort is in order.

Does Central Wire have a date for servicing EW2? It has been a while since any progress was made on this issue.
